1. Introduction

Purpose

V.A.P.O.R is a web-based fleet monitoring system designed to provide organizations with real-time visibility into their vehicle fleets. The platform enables users to monitor live vehicle locations, view fleet analytics, manage users, and oversee operational performance through an intuitive dashboard interface.

The platform implements role-based access control, ensuring that users only have access to features relevant to their responsibilities.

The system supports three user roles:

- **Viewer** - Monitors fleet information through read-only dashboards.
- **Manager** - Monitors fleet operations and analytics.
- **Administrator** - Manages users, permissions, and system administration.

2. Getting Started

2.1 Creating an Account

New users can create an account using their email address or Google Sign-In.

Steps

1. Open the Registration page.
2. Enter the following information:
 - Full Name
 - Email Address
 - Password
 - Confirm Password
3. Accept the Terms and Privacy Policy.
4. Click Create Account.

The system validates the password strength before creating the account.

Vehicle Analytics, Processing & Operations in Real-time

Monitor every vehicle. Every second.

 15 Vehicles

 5s Updates

 24/7 Monitoring

Create Your Account

Join the next generation of logistics management.

OR

Full Name

John Doe

Email

☐ By creating an account you agree to our [Terms](#) and [Privacy Policy](#)

CREATE ACCOUNT

[Sign In](#) [Forgot Password](#)

2.2 Verifying Your Email

After registration, a six-digit One-Time Password (OTP) is sent to the registered email address.

Steps

1. Enter the six-digit verification code.
2. Click Verify Account.
3. If the code expires, click Resend the code.

Once verification is successful, the account is activated and can be used to log into the system.

2.3 Logging In

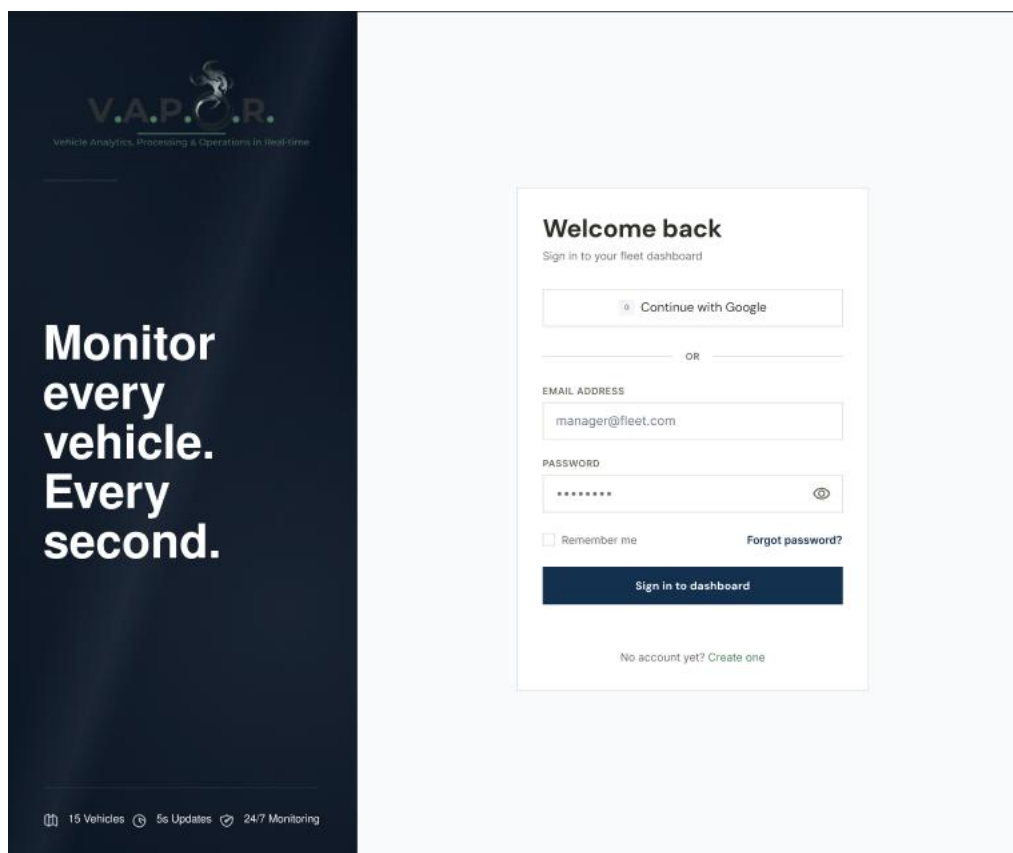

Existing users can log into the system using either:

- Email and password
- Google authentication

Steps

1. Enter your email address and password.
2. Click Sign in to Dashboard.
3. Alternatively, select Continue with Google.

After successful authentication, users are redirected to the dashboard associated with their assigned role.

3. Viewer Guide

The Viewer role provides read-only access to fleet information and live vehicle tracking.

Viewers can:

- Monitor active vehicles
- View fleet performance indicators

- Monitor vehicle status
- Access the live fleet map
- View real-time vehicle locations

Viewers cannot:

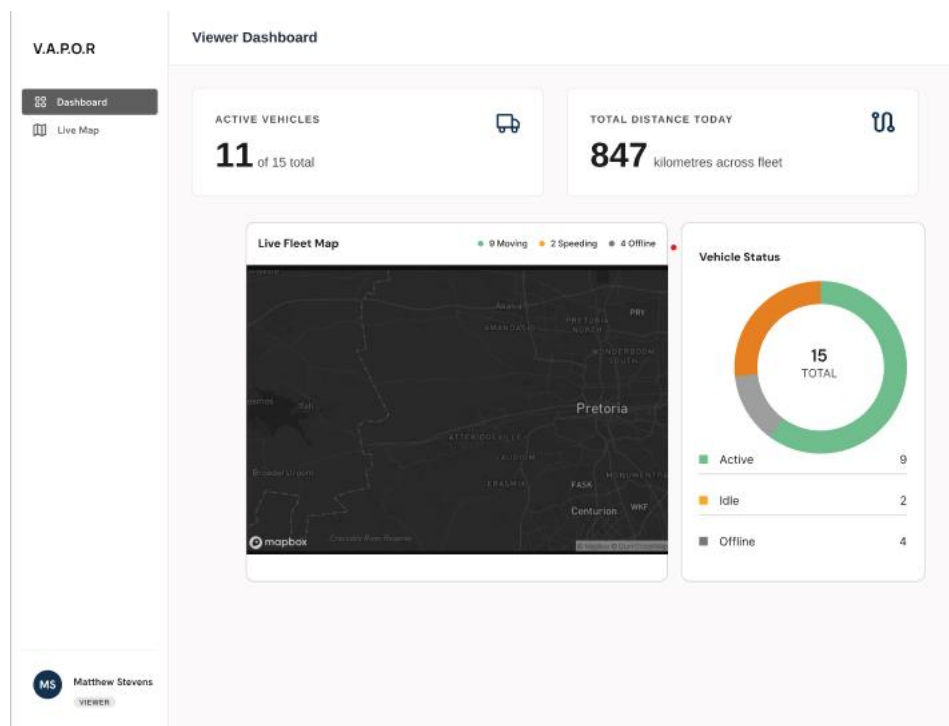

- Modify system settings
- Edit users
- Change user permissions

3.1 Viewer Dashboard

The Viewer Dashboard provides an overview of fleet activity. The dashboard contains:

- Active vehicles KPI
- Total distance traveled today
- Live fleet map
- Vehicle status chart

Users can zoom and pan around the map to inspect vehicle positions.

3.2 Live Fleet Map

Selecting Live Map from the navigation sidebar opens a dedicated tracking interface.

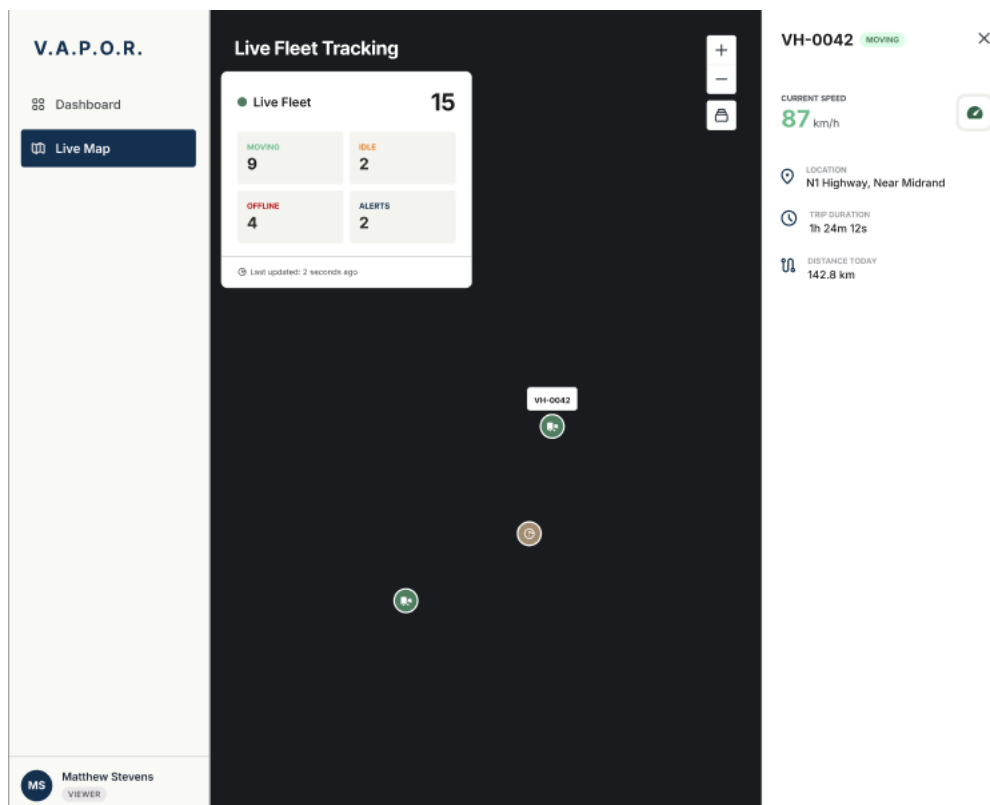

The Live Fleet Map allows users to:

- View live vehicle locations
- View fleet summary statistics
- Monitor moving, idle, and offline vehicles
- View detailed information for a selected vehicle

Selecting a vehicle marker displays:

- Current speed
- Current location
- Trip duration

Distance traveled today

4. Manager Guide

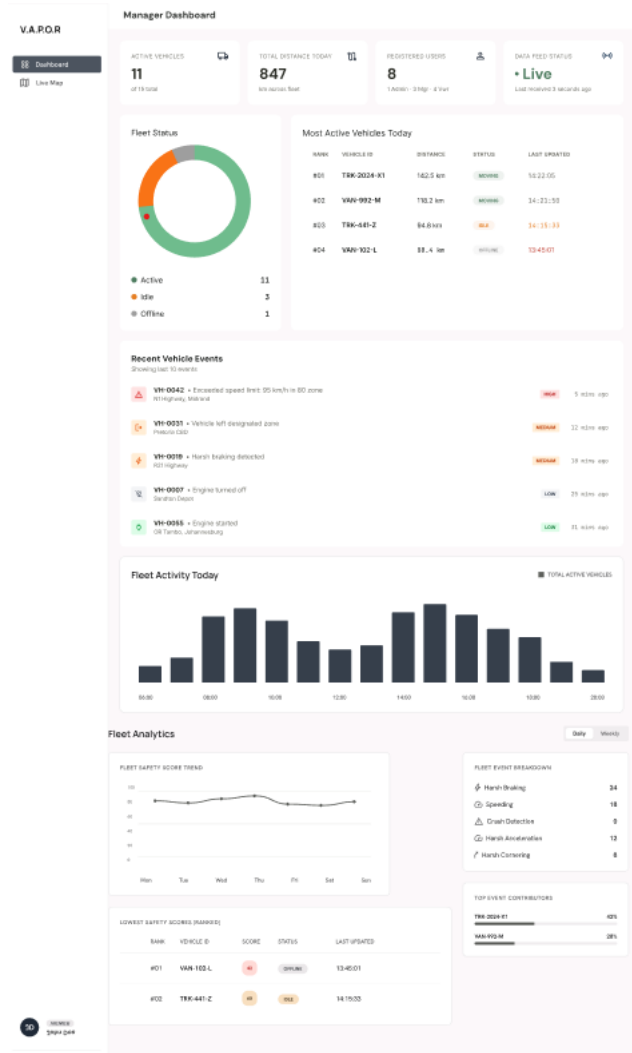

Managers have access to all Viewer functionality together with operational analytics.

The Manager Dashboard includes:

- Active vehicles
- Total distance today
- Registered users
- Data feed status

Additional operational widgets include:

- Fleet status
- Most active vehicles today
- Recent vehicle events
- Fleet activity today
- Fleet analytics with safety scores and event breakdowns

5. Administrator Guide

Administrators have unrestricted access to platform management features.

Administrators can:

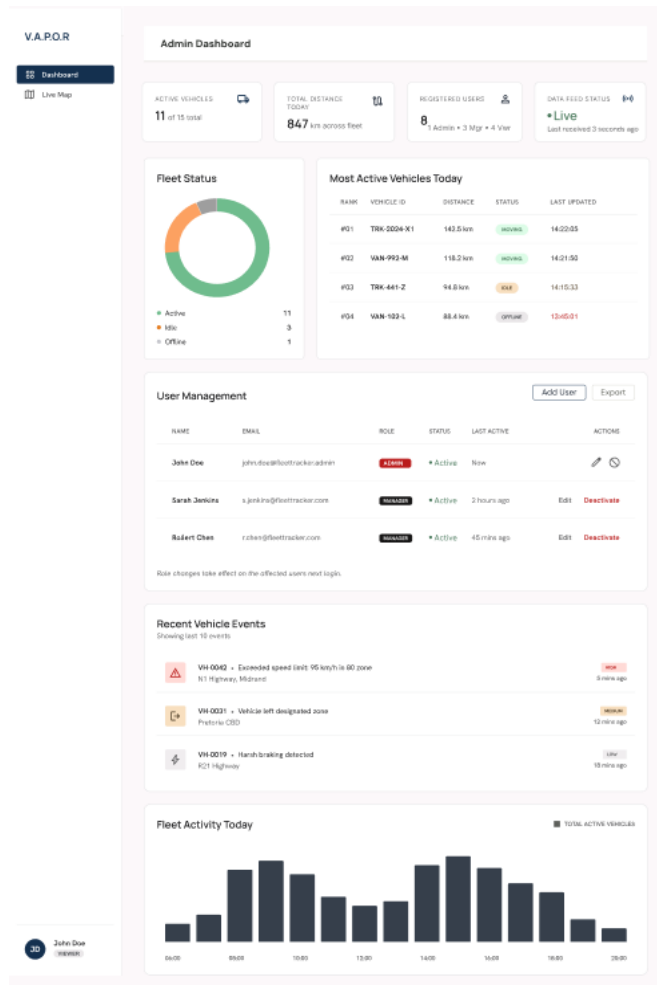

- Add users
- Edit user information
- Assign user roles
- Deactivate user accounts
- Export user information
- Monitor fleet performance

5.1 User Management

The User Management table provides an overview of all registered users.

The table includes:

- Name
- Email
- Role
- Status
- Last Active

5.2 Editing User Roles

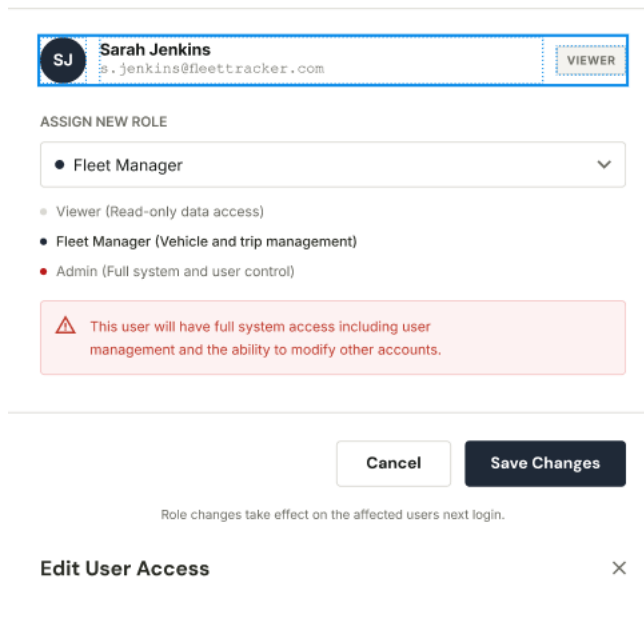

Selecting Edit opens the User Role Assignment window.

Steps

1. Select a new role from the dropdown menu.
2. Review the permissions associated with that role.
3. Click Save Changes.

If the Administrator role is selected, the system displays an additional warning before confirming the changes.

Selecting Cancel closes the dialog without saving any modifications.

ASSIGN NEW ROLE

● Fleet Manager ▼

- ◉ Viewer (Read-only data access)
- Fleet Manager (Vehicle and trip management)
- Admin (Full system and user control)

⚠ This user will have full system access including user management and the ability to modify other accounts.

Cancel Save Changes

Role changes take effect on the affected users next login.

Edit User Access X

6. Live Fleet Tracking

The Live Fleet Tracking interface provides a comprehensive geographic overview of the fleet.

Users can:

- Monitor live vehicle locations
- Identify offline vehicles
- Monitor active alerts
- View fleet movement statistics
- Inspect individual vehicle information

Vehicle telemetry updates automatically as new information is received by the platform.

7. Troubleshooting

7.1 Common Issues

7.1.1 Unable to Log In

- Ensure your email address and password are entered correctly.
- Check that your email address has been verified.
- If you have forgotten your password, use the Forgot Password option on the login page.
- If the problem persists, contact your system administrator.

7.1.2 Verification Code Expired

- Email verification codes are only valid for a limited time.
- Select Resend Code to receive a new verification email.
- Check your spam or junk folder if the email does not arrive within a few minutes.
- Ensure you are entering the most recently received verification code.

7.1.3 Live Map Not Displaying

- Verify that you have a stable internet connection.
- Refresh the webpage.
- Try opening the application in a supported browser such as Google Chrome or Microsoft Edge.

7.1.4 Vehicle Information Not Updating

- Wait a few moments for the next telemetry update.
- Refresh the dashboard.
- Confirm that the vehicle's telemetry device is online and transmitting data.
- Contact your fleet administrator if the issue persists.

7.1.5 Unable to Manage Users

- Verify that you are logged in using an Administrator account.
- Refresh the page and try again.
- If your permissions have recently changed, log out and log back in.

7.1.6 Dashboard Data Not Loading

- Check your internet connection.
- Refresh the dashboard.
- Wait a few moments while data is retrieved from the server.
- Contact your system administrator if the issue continues.

8. Frequently Asked Questions

Q: Why can't I access the Manager Dashboard?

A: Your account may not have the necessary permissions. Contact an Administrator to request the appropriate role.

Q: How often is fleet information updated?

A: Vehicle telemetry is updated in near real time as new data is received from connected vehicles.

Q: Can Viewers modify fleet information?

A: No. Viewer accounts have read-only access to the platform.

Q: What happens if my verification code expires?

A: Click Resend Code to receive a new verification code via email.

9. Contact Information

For technical support, feature requests, or general enquiries, please contact the system administrators.
